Data Cleaning Process

A systematic approach was taken to ensure the dataset was pristine and ready for robust analysis.

01

Data Import

Ingested **3,900 raw transaction records** from various sources into the analytics pipeline.

02

Handle Missing Values

Imputed **37 missing customer review ratings** using appropriate statistical methods to maintain data completeness.

03

Validate Data Integrity

Identified and removed duplicate entries and statistical outliers to improve data accuracy.

04

Standardize Formats

Normalized product categories, date formats, and other categorical variables for consistency.

05

Ready for Analysis

The cleaned and transformed dataset is now prepared for insightful customer shopping behavior analytics.
